

# INTEGRATED INTELLIGENCE

Navigating the modern business landscape is fraught with challenge. Today's business leaders must solve the known challenges, yet also deal with the unknown: surprises, problems and issues that arise during the journey. Succeeding in business requires thorough planning, sound execution, and the nimble feet required to change course and deal with these issues as they arise.

The Intelligence Group helps our clients meet these challenges head-on, in a manner as discreet, efficient and cost-effective as the way they run their own businesses. We help protect the bottom line and reputations of our clients by providing the knowledge and solutions they need to make sound, informed decisions in today's business environment.

Our service areas integrate seamlessly to provide custom solutions, be it actionable intelligence, investigative findings, tools for managing liabilities, or bottom-line security.

## TODAY'S TOOLS FOR TODAY'S CHALLENGES

The Intelligence Group is a business investigations and intelligence firm serving corporations, government organizations and their counsel. We help protect the bottom line and reputations of our clients by providing them with the knowledge and solutions they need to make sound, informed decisions in today's competitive business environment.

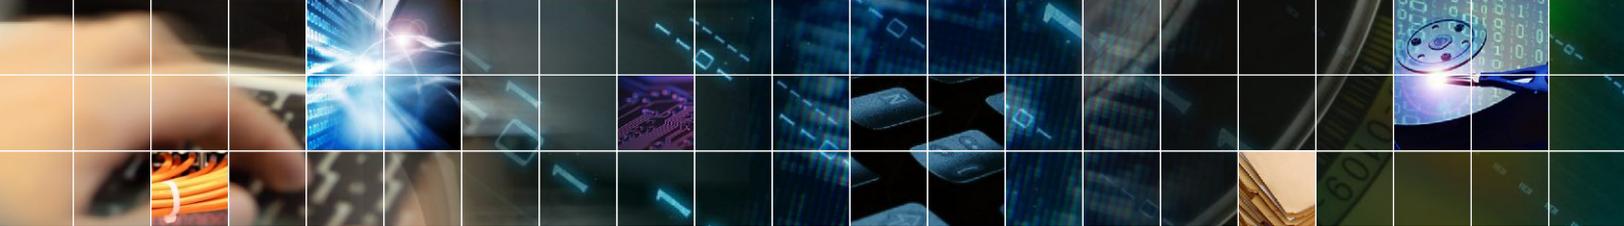

We maintain offices throughout the United States, in addition to a dedicated network of international resources.

# TODAY'S TOOLS FOR TODAY'S CHALLENGES

## INTELLIGENCE

## INVESTIGATIONS

## FORENSICS

Information is everywhere. While finding information may be increasingly easy, developing useful and meaningful intelligence is much more difficult. The Intelligence Group specializes in identifying, obtaining, and analyzing information that is relevant and appropriate for our clients' needs. We deliver this intelligence to our clients through a variety of focused products.

Intelligence services include:

- ▶ Due Diligence and Background Investigation
- ▶ Pre-employment Screening
- ▶ Assets and Financial Investigations
- ▶ Business and Competitive Intelligence

The Intelligence Group provides accurate and timely intelligence to corporate executives, attorneys, and decision-makers to help mitigate business risks on a daily basis. We scour open sources, synthesize data, and conduct integrated investigations that provide you with customized and accurate solutions that fit your needs.

When loss is suspected or litigation anticipated, organizations need to react quickly and effectively. The Intelligence Group offers a full suite of investigative services to support businesses and their counsel conducting internal and external investigations. Our hands-on approach – integrating cutting edge with classic investigative techniques – helps you meet these challenges head-on, and in the most effective manner possible.

Investigation services include:

- ▶ Litigation Investigation
- ▶ Employment and Internal Investigation
- ▶ Intellectual Property and Identity Theft
- ▶ Fraud and Financial Crimes
- ▶ Product Tampering, Diversion, and Anti-Piracy

We have extensive experience with sensitive, confidential assignments conducted within business settings, and the know-how to develop information without impacting the routine course of business. And, we understand the complex and sensitive nature of the investigative setting – be it the corporate home office, a factory floor, or preparation for trial in state and federal courts.

Investigating and securing against loss in today's business world requires tools and skill sets to successfully navigate the ever-changing digital landscape. Threats to an organization's assets and well-being typically leverage electronic data, communications and information to gain access and do harm – be it the theft of valuable data and intellectual property, vandalism, reputational damage or other risks.

Forensics services include:

- ▶ Computer Forensics / Digital Forensic Investigation
- ▶ Internet Anonymity Investigation
- ▶ Digital Monitoring and Surveillance
- ▶ Breaches and Incident Response
- ▶ Electronic Discovery and Litigation Support

The Intelligence Group is a leader in the application of emerging and advanced electronic tools and techniques for investigations and security applications. We utilize our trove of forensic and monitoring tools, proprietary methodologies, and software and hardware provider partnerships to apply an appropriate mix of technology and investigative know-how to successfully meet our client's objectives.
