

# PRESS RELEASE

## Robert Romagnoli, PE joins The Intelligence Group

The Intelligence Group announces that Robert Romagnoli has joined the firm as a Managing Director in the firm's Environmental Services Practice. Mr. Romagnoli is a licensed Professional Engineer and leading expert in contaminated sediment management. With expertise in site characterization and remedial design, he has more than 20 years of experience applying his knowledge and management skills to projects where sediment quality is a prominent issue. Mr. Romagnoli has served as the Program Manager for a number of large, highly-visible sediment projects within the New York/New Jersey Harbor region, each involving very complex and challenging systems. Some of his more significant responsibilities have included:

- Providing high-level strategic consulting services to responsible parties;
- Interacting and negotiating with federal and state agencies, including USEPA, USACE, NOAA, US Fish and Wildlife and NJDEP;
- Designing large-scale sediment dredging projects;
- Managing large project teams focused on the implementation of Remedial Investigation studies, risk assessments, hydrodynamic modeling, and feasibility studies; and
- Managing contaminant source investigations, including those associated with large-scale Combined Sewer Overflows (CSOs).

Mr. Romagnoli has served as the Engineer of Record for numerous remedial design projects, including large-scale dredging projects, sediment processing facilities, and near-shore Confined Disposal Facilities (CDFs). He has additional experience in the design of various wastewater and groundwater treatment systems. Mr. Romagnoli holds a BS degree in Civil Engineering from Bucknell University and an MBA from Cornell University. He is a licensed Professional Engineer in the states of New York and New Jersey.

According to Dennis Farley, President and CEO of The Intelligence Group, this milestone is marked by the opening of offices in Syracuse, NY and Washington, DC to provide a fuller range of services to new and existing firm clients. "The addition of Bob's leadership provides us the opportunity to more fully address the needs of our clients involved in complex, multiparty Superfund sites. The compressed timeframes we are seeing on projects

involving contaminated sediments require a unique and integrated blend of skill sets, focused on achieving realistic cleanup goals. We are looking forward to providing an increased level of service to our clients."

The Intelligence Group is headquartered in Bedminster, New Jersey and is an international provider of

Intelligence, Forensics and Investigation services for corporate, legal and government clients. Founded in 1999, the firm's Environmental Services Practice regularly advises clients on matters involving complex liabilities for environmental remediation such as allocation, cost recovery and related litigation. Its multi-discipline team of scientists, engineers, attorneys / legal professionals, archivists, researchers and former law enforcement personnel are routinely deployed on complex, multiparty matters such as Superfund sites involving contaminated sediments, groundwater and real property. The firm's Digital Forensics and Investigation practice also assists The Intelligence Group's environmental clients with services that include e-Discovery support for litigation, and the creation and management of databases, repositories and document management platforms.
