

PRESS RELEASE

Philip Spadaro joins The Intelligence Group

The Intelligence Group announces that Philip Spadaro has joined the firm as a Managing Director in the firm's Environmental Services Practice. Mr. Spadaro is a leading international expert in contaminated sediment management and waterfront redevelopment. Technically based in environmental chemistry with strong proficiency in hydrogeology, geology, regulatory affairs, and remediation technology, he has more than 28 years of experience applying his expertise and management skills to projects where sediment quality is a prominent issue. Mr. Spadaro also has extensive expertise in the siting, design, permitting, and construction of confined disposal facilities and in the fate and transport of contaminants in estuarine, riverine, and marine aquatic environments. He is an advisor to a number of clients in North America, South America, Europe, Asia, and the Middle East. In addition, Mr. Spadaro provides technical support for the superfund cost allocation process, construction claims, and cost-recovery actions or other matters related to sediment remediation and dredging.

According to Dennis Farley, President and CEO of The Intelligence Group, this milestone is marked by the opening of offices in Seattle, Washington and Portland, Oregon to service new contracts in the western United States. "In addition to our existing contracts, these new contracts and the leadership that Philip brings will provide a unique opportunity for our company to better address the needs of clients involved in complex, multiparty Superfund sites involving contaminated sediments. We are all looking forward to a period of growth and increased service to our clients."

The Intelligence Group is headquartered in Bedminster, New Jersey and is an international provider of Intelligence, Forensics and Investigation services for corporate, legal and government clients. Founded in 1999, the firm's Environmental Services Practice regularly advises clients

on matters involving complex liabilities for environmental remediation such as allocation, cost recovery and related litigation. Its multi-discipline team of scientists, engineers, attorneys / legal professionals, archivists, researchers and former law enforcement personnel are routinely deployed on complex, multiparty matters

such as Superfund sites involving contaminated sediments, groundwater and real property. The firm's Digital Forensics and Investigation practice also assists The Intelligence Group's environmental clients with services that include e-Discovery support for litigation, and the creation and management of databases, repositories and document management platforms.
